Customer Journey Map

Map out the learner's experience stage-by-stage, capturing actions, touchpoints, thoughts, feelings, process ownership, and improvement opportunities for EduGenie.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions What does the customer do?	- Identifies a topic or learning doubt. - Opens EduGenie and selects a task. - Enters a question, passage, or topic.	- Submits the request to EduGenie. - Reads the AI-generated response or summary. - Attempts the generated quiz when needed.	- Requests a personalized learning path. - Uses suggested resources and next topics. - Continues learning and revisits EduGenie as needed.
Touchpoint What part of the service do they interact with?	- HTML + CSS web interface. - Task dropdown: Explain, QnA, Quiz, Summary, Recommend Path. - Text area and Submit button.	- FastAPI backend endpoints. - Gemini / LaMini-Flan-T5 response modules. - Explanation, QnA, Quiz and Summary outputs.	- Learning recommendation module. - Structured beginner-to-advanced learning path. - Suggested videos, articles or books.
Customer Thought What is the customer thinking?	- Can EduGenie answer my question? - Can this topic be explained simply? - Which option should I use for my need?	- Is the answer clear and useful? - Can I understand this without a strong background? - Does the quiz show what I know?	- What should I learn next? - Can I follow a structured path? - Which resources will help me improve?
Customer Feeling What is the customer feeling?	- Curious - Uncertain but hopeful - Ready to explore	- Engaged - Relieved by simpler explanations - More confident	- Motivated - Supported - Focused on continued learning

Process Ownership Who is in the lead on this?	• Student/learner identifies the need. • EduGenie interface receives the input. • FastAPI handles the request.	• Gemini powers QnA, quiz and summary tasks. • LaMini-Flan-T5 supports concept explanation. • Backend modules return the generated result.	• Learner chooses and follows the path. • EduGenie generates recommendations. • Future improvements can support progress tracking and adaptation.
Opportunities How can we improve this stage?	• Make the task selection clearer for beginners. • Improve prompts and input guidance. • Add accessible, multilingual and voice-friendly entry options.	• Continue testing AI accuracy and response quality. • Improve clarity of quiz feedback and summaries. • Optimize responsive UI and performance across devices.	• Add progress-tracking dashboards. • Introduce gamification and adaptive learning paths. • Support mobile/offline use, image/PDF input and LMS integration.

Journey Summary

Primary customer: Student / learner. Core journey: identify a learning need → interact with EduGenie → receive an understandable AI response → use quizzes/summaries → obtain a personalized learning path → continue learning.

Source basis

This journey map is derived from the EduGenie project document, including its described user scenarios, modules, workflow, frontend interaction, learning recommendations, and future enhancement directions.
